ABSTRACT

Statistical data are presented on special education services in Illinois during Fiscal Year 1969. Seventeen tables of data describe facilities, population served and services received (both resident and outpatient), personnel, expenditures, and salaries of personnel. (KW)

STATE OF ILLINOIS

RICHARD B. OGILVIE, Governor

ANNUAL REPORT

STATISTICAL DATA FOR SPECIAL EDUCATION SERVICES Fiscal Year 1969

DEPARTMENT OF MENTAL HEALTH

JOHN F. BRIGGS, Acting Director
Springfield

12-69

FOREWORD

The statistical data in this report has been compiled and edited by staff of the Special Education Services in the General Office with assistance from the Learning Media Institute and the Division of Information Systems.

The purpose of this report is to provide statistical data which may be useful to persons responsible for provision of special education services and related supportive assistance, including funding, both within and outside the Department. While this report is believed to be a reasonably reliable index of the special education services provided during Fiscal Year 1969, it is imperative that the reader be aware that the statistical data is not necessarily complete or an accurate representation of the full range of special education services provided at a respective facility or Department-wide.

This report is based on information provided by a rather large number of different sources throughout Department operated facilities and the General Office. Furthermore, the information was reported at varying time periods during the fiscal year.

The data on enrollments and amounts of services was obtained from report Forms DMH-1068 ("Special Education Services, Statistical Recording and Reporting") submitted by staff at Department facilities on a monthly and year-end basis. The population figures for May 21, 1969, were provided by the Division of Information Systems based on reporting forms separate from the Department's special education services. The data on Title I, Elementary and Secondary Education Act, Public Law 89-313, was provided by staff of the Department's Title I Program Administration.

The patient population, staffing, and other aspects related to the provision of special education services was not static. Reorganization and changes in location of services affected the data available or submitted. In some instances, the data requested on DMH-1068 forms was not sufficient for our purposes, had to be estimated, or was unavailable for various reasons. Change and improved services even rendered the reporting forms somewhat obsolete. Moreover, special education services is only a component of the full complement of rehabilitative functions provided for patients. Finally, the data does not fully reflect the non-instructional services provided by special education staff in relation to consultation, liaison, and other activities related to patient treatment or handicapped children being provided with supportive assistance in the community.

PART I

ROLE AND FUNCTION OF SPECIAL EDUCATION SERVICES

ROLE AND FUNCTION OF SPECIAL EDUCATION SERVICES

Education for the emotionally disturbed and the mentally retarded client no longer is confined to a concept of "schooling" or "classroom teaching". In the Illinois Department of Mental Health, specialized educational approaches to client management and rehabilitation are not regarded as a substitute for common school education or for special education programs available elsewhere in the community, but are related to a client's total needs and to his return to the community.

Philosophy and standards have been established which define special education in the Department as a new mental health profession - comparable but by no means identical to special education elsewhere. Personnel, methods, and techniques from the field of education are modified as required for the mental health objectives of programs and clientele.

The historical role of education as being limited to operating an "academic school" as an adjunct to the institution program for school-age clients has been changed to a Department-wide professional service for support of all mental health programs within and outside of Department facilities. This means that special education is primarily responsible for:

1. Providing highly specialized educational methods and techniques to assist in educational diagnosis and rehabilitation of all-aged clients.
2. Establishing special education programs in Department of Mental Health facilities to form a continuum of services extending into special education programs in the public schools and community agencies.
3. Supporting the field of mental health through assisting in the training of professional workers and conducting research into educational methods and techniques for clients and staff.

All mental health services and programs at facilities for the mentally ill and the mentally retarded are correlated to needs of clientele. The Department's Special Education Services provides positive and definable support programs as an additional resource for interdisciplinary care and rehabilitation for clientele and community support efforts.

October 1963

PART II
DEFINITION OF TERMS

DEFINITION OF TERMS

Service - - means enrolled on Form DMH-1068 (a) for provision of free public education on a non-school district basis as required because of handicap in a child or adult patient and provided by an approved teacher at a Department facility for the mentally ill or the mentally retarded.

Enrolled - - means having the patient's name placed on a Form DMH-1068 (a) as required to be maintained for all patients provided with group or individual instruction by an approved teacher. The enrollment may include patients in residence who attend a public school but also receive group or individual instruction by an approved teacher at a Department facility.

Free public education - - means an organized instructional program of elementary, secondary, or adult education recognized as such under State law, which is provided in whole or in part at a Department facility as essential to diagnosis, development, or rehabilitation and without payment by the patient (there may be charges for board, room, medical care, and other non-educational expenses). It may include an organized program for instruction for preschool-age level patients.

Non-school district basis - - means that eligibility to receive free public education at a Department facility does not depend upon residence in a particular county, township, independent or other school district within the State.

Handicap - - means deficiency in basic elementary or secondary education as exhibited by mentally retarded or seriously emotionally disturbed patients who also may be hard of hearing, deaf, speech handicapped, crippled, or otherwise impaired who by reason thereof require special education for adjustment or return to the community. It does not include handicap solely out of being delinquent or orphaned, or where free public education is possible entirely in the community, either in a special or regular education program.

Child - - means an out-patient or in-patient who has a chronological age of twenty years or less for whom special education is mandatory under Article 14 of the School Code, but not necessarily eligible for such instruction in the community.

Adult - - means an in-patient or out-patient with a chronological age from twenty-one through thirty-five years.

Approved teacher - - means a full-time or part-time person employed under the Personnel Code or by contracted service at a Department facility, approved in accordance with the POLICY ON ILLINOIS TEACHER'S CERTIFICATES AND AUTHORIZATION FOR SPECIAL EDUCATORS (now Official Bulletin No. 75-54).

Day of attendance - - means attendance in a program of group instruction provided by an approved teacher under Option 1, 2, 3, 4, 5, or 6 for a two-hour period on any one day; or, one hour of individual instruction. An hour may not consist of less than fifty minutes of instruction.

Revised, July 1967

PART III
SUMMARY OF STATISTICAL DATA

SUMMARY OF STATISTICAL DATA

Facilities (FY 1969)

During Fiscal Year 1969, there were 26 residential facilities operated by the Department. Another facility, the Institute for Juvenile Research, provided only out-patient services. In addition, Zone VIII collaborated (by providing staff and other resources) with Southern Illinois University in operation of a Day School on campus at Carbondale.

Some special education services were provided during the year at 23 residential facilities with patients in residence. In addition, services were provided on an out-patient basis at the Institute for Juvenile Research and at the Zone VIII S.I.U. Day School. No special education services as such were provided at any time during the fiscal year at Manteno State Hospital, Illinois Security Hospital, and William W. Fox Children's Center.

Department residential facilities not reporting provision of special education services for their residents on May 21, 1969 (see next paragraph) were Illinois State Psychiatric Institute, Charles F. Read Zone Center, Manteno State Hospital, Peoria State Hospital, Illinois Security Hospital, and William W. Fox Children's Center. Charles F. Read Zone Center reported provision of special education services on a "day school" basis.

Population (All Ages)

On May 21, 1969, there were 28,611 patients in residence at 26 facilities. Special education services were reported as being provided for residents at 20 of the 26 residential facilities and at 1 of the 2 facilities without residents.

During the fiscal year there was an average daily enrollment of 1,386 residents and out-patients in the special education services at 25 out of the 28 facilities making such provisions sometime. The average daily attendance amounted to 1,237 patients of all ages. Patients received an average of 1.9 hours of special education services per day.

On May 31, 1969, 20 facilities reported a total of 1,485 residents of all ages as being enrolled in special education services. Among the residents enrolled in special education services, 3 were of pre-school age (below 5 years), 693 were of elementary education age (5-14 years), 649 were of secondary education age (15-20 years), 125 were of adult education age (21-35 years), and 15 were above 35 years of age.

There were 4,426 patients, aged 5 to 21 years, in residence among 26 Department facilities on May 21, 1969. Among the resident population, there were 2,100 of elementary education age (5-14 years) and 2,320 were of secondary education age (5-21 years.)

About 33 per cent (1,342) of the patients in residence, aged 5 to 21 years, were enrolled in special education services on May 31, 1969. The total enrollment was about equally divided between those of elementary education age (693 enrolled) and secondary education age (649 enrolled).

Article 14 of The School Code requires provision of special education programs in public schools to accommodate handicapped children from 5 to 21 years of age (3 to 21 years of age for the blind and partially seeing). Among the 25 residential facilities operated by the Department slightly less than one-half (2,197) of the residents, age 5 to 21 years of age, were estimated to be eligible for special education as defined for handicapped children in public schools. Among this resident group, about 52 per cent (1,138) were enrolled among the 20 Department operated facilities providing special education services on May 31, 1969.

Resident and Out-Patient Population (5-21 years of age)

During FY 1969 there was an average daily enrollment of 1,256 residents and out-patients, 5 to 21 years of age, in special education services as provided at 25 facilities operated by the Department (includes Zone VIII S.I.U. Day School).

On May 31, 1969, there were 11 Department operated facilities which reported a total of 163 out-patients, 5 to 21 years of age, as being enrolled in special education services at their respective facility. Nine facilities reported a total of 53 residents in this age range as being enrolled in local public schools. The combined resident and out-patient enrollment, 5 to 21 years of age, amounted to a total of 1,505 patients among 23 Department facilities (including the Zone VIII S.I.U. Day School).

Personnel

At year-end (June 30, 1969) there were 258 staff employed for provision of special education services at 25 facilities. Illinois State Psychiatric Institute and Peoria State Hospital still carried special education staff on the payroll but reported no enrollments in special education services (thus the discrepancy between the number of facilities employing staff and the number of facilities reported in the preceding section reporting enrollments). All but 13 of the staff were employed in position classifications of the Special Educator Series and approved for provision of free public education on a non-school district basis by the Office of the Superintendent of Public Instruction. Three residential facilities did not employ any special educators (Manteno State Hospital, Illinois Security Hospital, and William W. Fox Children's Center.)

The number of personnel employed for provision of special education services ranged from 1 to 35 per facility among the 23 facilities at which special education services were provided for residents and/or out-patients at year-end. There was an average of 16 staff persons per facility.

There was a per patient ratio of one to six based on the number of staff (administrative and non-administrative employed on June 30, 1969) compared with the resident and out-patient enrollment (1,505) reported on May 31, 1969.

Among the various levels of staff, 29 were administrative and 229 were non-administrative. Some non-administrative staff served in consultative, liaison, or other non-instructional capacities in which enrollments are not reported. For this reason, the staff-patient ratio as related to provision of special education services is somewhat greater than indicated in the reports received from the various facilities.

Among the 258 persons employed for provision of special education services, all but 7 had completed 4 or more years of higher education. The degrees possessed were as follows: 5 Doctorate, 86 Master, and 160 Bachelor.

Salaries

Salaries of personnel employed in position classifications of the Special Educator Series ranged from \$484 to \$1,392 per month for the payroll period ending June 30, 1969. For this period, there was a median monthly rate of \$759 and a mean of \$772. These figures included all position classification levels from Special Educator Trainee through Special Education Coordinator (Zone).

Funding

During Fiscal Year 1969, an estimated \$2,496,546 was expended on the direct provision of special education services at 24 Department operated facilities (includes Zone VIII S.I.U. Day School). This figure is slightly under the actual expenditure, since separate costs for special education services at Illinois State Psychiatric Institute were not estimated. Of the total expenditure, \$2,124,891 was General Revenue and \$371,655 Federal. The average per patient expenditure amounted to \$1,704 from General Revenue, \$298 from Federal, and \$2,002 from both sources of funding.

(a) Resident population figures are for date of May 21, 1969. All other figures are for the Fiscal Year, July 1 to June 30.

(b) Average hours of special education per patient per day only includes instructional time provided directly or under supervision of a special educator.

(c) Illinois Juvenile Research Institute (William Healy School) reported no patients in residence.

(d) Average daily enrollment and average daily attendance includes both patients in residence and out patients.

(a) Patients enrolled on May 31, 1969 for Special Education Service in a DMH operated facility between 5 and 21 years of age and who would be eligible for special education in a public school according to the mandate provided by Article 14 of the School Code (HB 1407).

(b) Patients in residence on May 21, 1969; therefore, there may be discrepancies between the number reported in residence and the number reported enrolled on May 31.

(c) No report received from Illinois Psychiatric Institute.

(d) No patients in residence.

(e) All patients enrolled were out-patients served by the Day Treatment Program.

(f) Percentage results from larger number being enrolled on May 31 than reported in population on May 21.

(a) Resident population on May 21, 1969; enrollments are reported for May 31, 1969.

(b) Combined enrollment is total of patients in residence and out-patients; patients enrolled in public schools are not included in combined enrollment since the reports for this group do not distinguish whether these are resident patients or out-patients.

(a) Pediatric reported separately at bottom of table in order to provide categories comparable to Division of MR.
(b) No information available from Zone Programs in regard to category of mental retardation.
(c) Blind and Deaf are included in count of other categories.
(d) No report submitted in categories, but primarily no ambulatory patients.
(e) Division of Mental Retardation figures submitted separately by facilities for May 31; therefore, some discrepancies will occur from other population tables where information was obtained for May 21 and different source.

(a) Expenditures for year ending August 31, 1969, including outstanding encumbrances which must be liquidated by June 30, 1970.

(b) Projects aimed at serving target population, aged 5-21.

(c) Includes funds for more than one project operated by the facility.

(d) This phase of the Department-wide Pre-Vocational Education Project did not become operative.

(e) Project(s) were not intended to provide direct services to children but to improve the quality of staff by providing services and in-service training.

(f) Includes three projects: Learning Media Institute, Pre-Vocational Education Workshop, and the Department-wide Eight Phase Pre-Vocational Education Projects.
